

STOCK MARKET INDEX CONSULTING SERVICE

This **online service** is designed for private and public operators dealing on stock markets and on the forex market.

Trading systems is one of the **most profitable methods** to do business on financial markets, i.e. automatic computer systems that process buy and sell orders on the market in real-time thanks to specific algorithms. Trading systems, developed and realized by VI FOREX & OPTIONS LTD, are **trend follower** (in this case short-term trends) and not reversal type, that is to say all types of positions can be assumed: long, short and flat. Currently the trading system method is available only on 14 Contracts indicated. As regards the stock market, options and indices VI FOREX & OPTIONS LTD has been operating on the market for 15 years now and it has developed a time-tested and reliable **trading system**. Therefore, the trading data for said markets are VI FOREX & OPTIONS LTD property. The main feature shared both by the services for the use of the trading systems and those using a trading method is the **dispatch of trading messages by password using internet connection** . While VI FOREX & OPTIONS LTD takes care personally of the Forex market, the stock market, options and indices data are provided by VI FOREX & OPTIONS LTD

Every trading system supplied from VI FOREX & OPTIONS LTD is available only for clients living in countries where they are conformed according to national law.

During these fifteen years we have worked to develop a **scientific method for trading on financial markets**. Over the past four years we have translated the basic principles of the Gann method into a mathematical language:

“Trading according to the market trend preventing that a profit can become a loss collecting always a part of the profits until the market is heading in your direction, never rush to sell, the human factor is the worst enemy of success in investments”

All 14 Indexes have a trading system which can keep a position open even overnight. There are two ways to subscribe to the service:

- 1) **Subscription at a monthly rate** of 250 Euros for single contract starting to pay fees on subscription date. We can provide a 10% discount rate starting from 2 contract subscribed. 20% from minimum 4 contract subscribed. 30% from minimum 6 contracts and 40% from minimum 8 contract
- 2) **Subscription at a monthly rate** of 350 Euros for single contract paying fees on expiration contract date. We can provide a 10% discount rate starting from 2 contract subscribed. 20% from minimum 4 contract subscribed. 30% from minimum 6 contracts and 40% from minimum 8 contract
